ClimateAi®

CAGE: 8F2C3 | UNIQUE ENTITY ID: PEF3WJLE5GD4

ABOUT
WHO WE ARE

ClimateAi delivers AI-enabled, long-range weather forecasts and hazard models to support risk mitigation, asset protection, and resilience planning for public and private sector industries managing weather-sensitive infrastructure and supply chains.

7 PATENTS

50+ COMMERICAL CUSTOMERS

80+ COUNTRIES

CORE
COMPETENCIES

AI-Enabled Forecasts and Hazard Models
- Global, high resolution forecasts from 1 day – 6 months out and 10+ years out
- Seasonal hurricane and tropical cyclone landfall modeling for all oceanic basins
- Seasonal and long-term 10m flood hazard mapping

Operational Risk Assessments and Decision Support
- Location and asset-specific impact metrics
- Interactive planning dashboard
- Shareable, customizable risk alerts

PAST
PROJECTS

- Early identification of weather-driven operational hardships to inform military activities
- Contingency planning for installation resilience
- Regular tropical cyclone forecasts to guide international response planning
- Long-term weather and hazard projections and analysis to optimize site and infrastructure investments

DIFFERENTIATORS

- Proprietary hyperlocal (1km x1km), high accuracy forecasts
- Industry validated extreme event models
- Global coverage across near-term (1 - 6 month) and long-term (10 - 50 years) timescales
